

REV	DESCRIPTION	DATE	BY
P1	Making sketch for the prototype build plan	2026-10-02	AC

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 400 x 100 mm, drawn standing on end; corners rounded 5 mm, edges deburred.

Four 4.5 mm holes, 10 mm in from each end, 12 mm in from the top and bottom edges (380 mm and 76 mm apart).

Printed face in three zones (layout in the build plan): English at left, the partner city's second language in its own script in the middle, and at right a 50 mm QR code to the sensor register over the phone or text number.

Text: what is measured, who is responsible, how long data is kept; icons in the style of DTPR. Keep the QR code clear of the holes.

Fit: on the front panel, bottom edge 125 mm up, four M4 tamper-resistant screws with nyloc nuts inside.

Check: the QR code scans from 1 m with a phone.
