WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Folded tray 460 wide, 680 tall, 98 deep, open to the front.

Back, top, bottom and sides from one blank; weld or rivet and seal the four corners. 15 mm return flange round the front.

Back wall: four 9 mm holes 25 mm each side of center at 60 and 620 mm up from the bottom edge; 25 mm cable hole at 340.

Bottom: six vent slots 30 x 70 mm, 60 mm apart; glue insect mesh inside them.

Top: four 7 mm holes at 150 mm each side, 30 and 70 mm behind the front panel line, for M5 rivet nuts (hood).

Flange: twelve 6 mm holes for M4 rivet nuts (front panel): three along the top and bottom, three down each side.

Check: the flange is flat to 1 mm so the gasket seals.
