P1	Making sketch for the prototype build plan	2026-10-01	AC

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 290 wide x 370 tall, corners rounded 5 mm.

Eight 4.5 mm holes on the front panel studs: 138 mm each side and on the center line, 7, 185 and 363 up.

Ribbon slot 70 x 8 mm, centered, 49 to 57 mm below the top edge; the e-paper panel's cable passes through it.

Mark the board positions from the boards themselves and drill 2.7 mm for M2.5 standoffs: driver board top center, controller lower left, converter and LED driver lower right, terminal block bottom left.

Fit: it sits on 15 mm spacers over the studs and presses the e-paper panel onto its foam gasket on the window.

Check: it drops over all eight studs without force.
