Scale 1:10; looking at the right side (along -X)

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Top 413 x 186 mm with two sides folded down 90 degrees, 486 mm high overall; a 15 mm flange folded inward along each side's back edge. Rivet or weld the top corners.

Two 6.5 mm holes in each side at mid-depth, 120 and 380 mm up from the bottom edge, for the standoff screws.

In each flange, two 7 mm holes for M5 rivet nuts, 100 and 400 mm up, for the back panel's thumb screws.

Fit: on four 25 mm standoffs on the cabinet sides; 25 mm air gap at the top and sides; open at the bottom.

Check: the gap is 25 mm, give or take 3, all round.

CityTwin sun shield (outdoor sites): making sketch
